THE undersigned are prepared to introduce into use in Tennesace W. E. CHILDS & CO.'S PATENT ELAS. TIO FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Comcanies, and the public to examine its superiority over othe ARCHITECTS AND BUILDERS should not fail to ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is impervious to water, clastic, and flexible. It contracts and expands with the changes of the almosphere, and will neither evaporate, cruck nor rot; and, as to its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing. proved, and we will warrant it water proved that an engage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tin, sinc, copper, or iron roofs—it making no difference how sheep or flat they may be—for seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it

will size better satisfaction.
It will also be found to be the best thing ever invented to It will also be found to be the best thing ever invented to cover or mend old leaky tip, tar and gravelroofs, or around chimneys, scattles, dormar windows, and gutters, where the tin is rusted through. This Coment can be put on to last, as long as atone, and form a perfect adhesion to any object to which it is applied. Tin Rusts can be painted over (and warranted not to leak) at two d liars and fifty centre than paint. This Roofing will be found to be the best theng for covering large mosts where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steambott Decks, and, in fact every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents no chance for fire to communicate, and any light substance will burn out without ignifing. light substance will burn out without systing.

THIS KILN will burn four hundred bushels of Lime-Stone (which, if good stone, is equal to one thousand bushels of slacked lime) in twenty four hours, with four

cords of wood, and is perpetual in its operation, the lime being drawn once in three to six hours, from the base, and replenished at the top of the cupols. This is but the or-
